

Books in the field of nanomaterials

- D. Vollath: Nanoparticles-Nanocomposites-Nanomaterials. (2013) WILEY-VCH 310 pages.
- D. Vollath: Nanomaterials. Second Edition. (2013) WILEY-VCH 375 pages.
- D. Vollath: Nanomaterials. (2008) WILEY-VCH 352 pages.

Publication in the field of nanomaterials

1. D. Vollath: Melting temperature of metallic nanoparticles embedded in a rigid matrix. *International Journal of Materials Research* 103 (2012) 278-282.
2. D. Vollath: Estimation of particle size distributions obtained by gas phase processes. *J. Nanopart. Res.* 13 (2011) 3899-3909
3. D. Vollath, F. D. Fischer: Fluctuations, bistability and hysteresis connected to phase transformations of nanoparticles. *Prog. in Mater. Sci.* 56 (2011) 1030-1076.
4. D. Vollath, F. D. Fischer: Statistical model for ensembles undergoing phase transformations. *J. Mater Chem.* 21 (2011) 11613-11617.
5. D. Vollath: Bifunctional Nanocomposites with Magnetic and Luminescence Properties. *Adv. Mater.* 22 (2010) 4410-4415.
6. F. D. Fischer, M. Leindl, H. Dirschmid, D. Vollath, H. Clemens: Temperature fields in particles and in their environment due to sudden phase transformations. *ZAMM* 90 (2010) 641-650.
7. D. Vollath, F. D. Fischer: Phase transformations of nanoparticles exposed to hydrostatic pressure. *J. Nanopart. Res.* 12 (2010) 1859-1868.
8. D. Vollath, F. D. Fischer: Bistability, hysteresis and fluctuations in adiabatic ensembles of nanoparticles. *J. Nanopart. Res.* 11 (2009) 1485-1499.
9. J. Svoboda J, F. D. Fischer, D. Vollath: Modeling of formation of binary-phase hollow nanospheres from metallic solid nanospheres. *Acta Mater.* 57 (2009) 1912-1919.
10. D. Vollath, F. D. Fischer: Structural fluctuations in ensembles of nanoparticles. *J. Nanopart Res.* 11 (2009) 647-654.

11. D. Vollath: Plasma synthesis of nanopowders. *J. Nanopart. Res.* 10 Suppl. 1 (2008) 39–57.
12. D. Vollath: Plasma synthesis of nanopowders. *J. Nanopart. Res.* 10 Suppl. 1 (2008) 39–57.
13. D. Vollath, F. D. Fischer: Structural fluctuations in nanoparticles. *J. Nanopart. Res.* 11 (2009) 433–439.
14. D. Vollath: Plasma Synthesis of Nanoparticles KONA-POWDER AND PARTICLE 25 (2007) 39-55.
15. F. D. Fischer, T. Waitz, D. Vollath, N. K. Simha: On the role of surface energy and surface stress in phase-transforming nanoparticles. *Prog. Mater. Sci.* 53 (2008) 481–527.
16. S. Schlabach, D. V. Szabó, D. Vollath, P. de la Presa, M. Forker: Zirconia and titania nanoparticles studied by electric hyperfine interactions, XRD and TEM. *J of Alloys and Compounds* 434 (2007) 590-593.
17. D. Vollath, D. V. Szabó: Microwave Plasma Synthesis of Ceramic Powders. *Advances in Microwave and Radiofrequency Processing*. Editor M. Willert-Porada. Springer (2006) 619- 626.
18. D. Vollath, F. D. Fischer, M. Hagelstein, D. V. Szabó. Phases and phase transformations in nanocrystalline ZrO_2 . *J. Nanopart. Res.* 8 (2006) 1003–1016.
19. D. Vollath: Gold Ruby Glass. *Optical Properties of Nanoparticles*. G.I.T. Lab. Journal 10(5/2006) 24-27.
20. D. Vollath, D. V. Szabó: The Microwave plasma process - a versatile process to synthesise nanoparticulate materials. *J. Nanopart. Res.* 8 (2006) 417–428.
21. S. Schlabach, D. V. Szabó, D. Vollath, P. de la Presa, M. Forker: Structure and grain growth of TiO_2 nanoparticles investigated by electron and X-ray diffractions and Ta-181 perturbed angular correlations. *J Appl. Phys.* 100 (2006) 024305.
22. D. Vollath: Commercialization of Nanotechnologies – A consultants viewpoint. *Proc. 10th Int. Conf. Commercialization of Micro and NanoSystems Conference*. 523-526.
23. S. Schlabach, D. V. Szabó, Z. Shi, D. Wang, D. Vollath: Synthesis of nanoparticulate SiC in a low temperature microwave plasma process. *VDI Berichte* 1839 (2004) 167-170.

24. D. V. Szabó, S. Schlabach, H. Reuter, D. Vollath: Influence of halides on the luminescence of oxide/anthracene/polymer nanocomposites. MRS Symposium Proc. 846 (2005) 177-182.
25. S. Schlabach, D. V. Szabó, D. Vollath: Structure of alumina and zirconia nanoparticles synthesized by the Karlsruhe Microwave Plasma Process. Symposium on Functional Nanomaterials for Optoelectronics and other Applications 2003 E-MRS Fall Meeting, Warsaw : Solid State Phenomena 99-100 (2004) 191-196.
26. D. Vollath, D. V. Szabó: Synthesis and Properties of Nanocomposites. Adv. Eng. Materials, 6, (2004) 117-127.
27. D. Vollath, D. V. Szabó, S. Schlabach: Oxide / Polymer Nanocomposites as New Luminescent Materials. J. Nanoparticle Research, 6 (2004) 181-191.
28. D. Vollath, D. V. Szabó: Nanocomposites als Funktionswerkstoffe mit neuen Eigenschaften. 14. Symp. Verbundwerkstoffe und Werkstoffverbunde, Wien, A, 2.-4. Juli 2003 Weinheim [u.a.] : Wiley-VCH, 2003 S.35-44.
29. A. Braun, M. Wolff, R. Clasen, D. Vollath: Translucent polycrystalline ceramic compacts from doped alumina - Sintering behavior and microstructure development. Ceramic engineering and Science Proc. 2 (2003) 115-120.
30. D. V. Szabó, S. Schlabach, H. Reuter, D. Vollath: Luminescent nanocomposites based on oxide nanoparticles. VDI Berichte 1803 (2003) 23-27.
31. D. V. Szabó, S. Schlabach, B. Xu: Modifying the surface of nanoparticles by coating. Surface Engineering Science and Technology II (2002) 3-14.
32. D. Vollath, I. Lamparth, D. V. Szabó: Nanocomposites as New Functional Materials. BHM, 147 (2002) 350-358.
33. D. Vollath, I. Lamparth, D. V. Szabó: Coated Nanoparticles – Synthesis and Properties. Proceedings 6th International Aerosol Conference, Taipeh/Taiwan, 2002. Vol. 1 S.111-12.
34. D. Vollath, I. Lamparth, D. V. Szabó: Fluorescence from coated nanoparticles. Mat. Res. Soc. Symp. Proc. Vol. 703 (2002) V7.8, Nanophase and Nanocomposite Materials IV : Papers from the MRS Fall Meeting, Boston, Mass., November 26-20, 2001 Warrendale, Pa. : Materials Research Society, 2002

35. D. V. Szabó, I. Lamparth, D. Vollath: Complex high Frequency properties of ceramic-polymer Nanocomposites: comparison of fluoropolymers and acrylic based compounds. *Macromolecular Symposia*, 181 (2002), 393-398.
37. I. Lamparth, D. V. Szabó, D. Vollath: Ceramic Nanoparticles coated with oligomers based on acrylic derivatives. *Macromolecular Symposia*, 181 (2002), 107-112.
38. D. Vollath, D. V. Szabó, M. Forker, M. Hagelstein: Structural Disorder in the Anion Lattice of Nanocrystalline Zirconia and Hafnia Particles. *Mat. Res. Soc. Symp. Proc. Vol. 634 B7.7.1-B7.7.6* (2001).
39. D. V. Szabó, D. Vollath: Nanopulver und Nanocomposite: Grundlegende Betrachtungen und Anwendungsperspektiven. *DKG-Handbuch „Technische Keramische Werkstoffe“* 59. Ergänzungslieferung, Kapitel 4.4.3.3., Sept. 2000.
40. D. Vollath, D. V. Szabó: Synthesis of Nanopowders by the Microwave Plasma Process- Basic Considerations and Perspectives for Up Scaling. Book contribution in „*Innovative Processing of Films and Nanocrystalline Powders*“, edited by K.-L. Choy, Imperial College Press, 2002, ISBN 1-86094-316-0, S.220-251.
41. D. V. Szabó, D. Vollath, W. Arnold: Microwave Plasma Synthesis of Nanoparticles- Application of Microwaves to produce New Materials. *Ceramic Transactions* 111 (2001) 217-224.
42. D. Vollath, E. Pellegrin, D. V. Szabó: Superparamagnetic Ferrites- Realization and Physical Obstacles. *Mat. Res. Soc. Symp. Proc. Vol. 581* (1999) 41-46.
43. M. Forker, J. Schmidtberger, D. V. Szabó, D. Vollath: Perturbed-Angular-Correlation Study of Phase Transformations in Nanoscaled Al₂O₃-coated and Uncoated ZrO₂ Particles Synthesized in a Microwave Plasma. *Phys. Rev. B* 61 (2000) 1014-1025.
44. D. Vollath, D. V. Szabó: Nanoparticles from Compounds with Layered Structures. *Acta Mater.* 48 (2000) 953-967.
45. D. Vollath, D. V. Szabó: Nanocomposites – Neue Funktionswerkstoffe an der Schwelle zur industriellen Anwendung. *FZK-Nachrichten* 31 (1999) 197-206.
